1. On 26 May 1956 both Bob and Hal of were in contact with the contracting officer and appeared to be "quite disturbed" with information reported to them by . The officials seemed so concerned that the undersigned was in communication with them for the purpose of resolving the points raised. Mr. reported that the Executive and Finance Officers on the last of the week ended 26 May 1956 informed him the pay data information concerning personnel had not been received. We fully appreciate that there was a delay in forwarding the pay data for these employees but the major cause for delay was themselves in that final pay information did not reach the undersigned until approximately 9 or 10 May. We were aware that such information could be hand delivered approximately the middle of May but to go by pouch would take longer. According to my information, delivery of this dispatch was effected by hand on 19 May; therefore, it was not understood how could have been, if in fact he was, informed that the data was not available on 26 May. Please advise the complete circumstances with respect to this point in order that may be advised.

2. Another point raised concerned whom it was reported, was required to make an official trip on behalf of at the direction of the Commanding Officer and, was denied funds for the purpose of procuring a ticket and defraying expenses. The funds are reported to have been made available after some discussion but was informed it would be necessary for him to render his accounting to . My response to the official on this point was to the effect that this statement was rather difficult for me to reconcile, particularly in view of the fact that an advance was made to himself for return transportation, but that I would query the field and relay to them the information received on this subject. As you are aware, our memorandum of general underestimating, particularly paragraph number 4 located on pages 3 and 4, specifically provides for the handling of the type of case as reported to the undersigned. Your early comment will be appreciated.
